

# Energy and Water Policy

ISG is an international construction services company delivering fit out, construction and a range of specialist services.

This Policy supports ISG's Sustainability Policy and sets a framework for our energy and water management. ISG is committed to minimising the amount of energy and water that we use and reducing our dependence upon carbon based sources of supply. We will do this by:

- Complying with legislation.
- Measuring the use of energy and water from our operations.
- Minimising energy and water consumption from our operations.
- Supporting our stakeholders with their energy and water requirements.

We will be open and transparent and commit to reporting our performance. A copy of this Energy and Water Policy will be made available upon request to any interested party.

Overall responsibility for this policy rests with the ISG Board of Directors and the Managing Directors of ISG businesses.
